

# CANUTILLO A Premier District

## DAILY SYMPTOM SCREENING FOR STUDENTS

My school nurse is: \_\_\_\_\_ Phone # \_\_\_\_\_

### STAY HEALTHY

Practice proper hygiene and keep social distance when instructed

### STAY INFORMED

Have your vaccines updated and visit our website for updates

We require all parents and caregivers to daily screen for the presence of any of the following symptoms prior to sending your child to school.

If symptoms are present, do not send the student to school. Stay home and contact your school nurse.

#### Check symptoms for changes from usual or baseline health before they go to school:

- ✓ Temperature of 100 degrees Fahrenheit or higher
- ✓ Sore throat
- ✓ Cough (for students with chronic cough due to allergies or asthma, a change in their cough from usual)
- ✓ Difficulty breathing (for students with asthma, check for a change from their baseline breathing)
- ✓ Diarrhea or vomiting
- ✓ New onset of severe headache, especially with a fever

#### If your child DOES have any of the symptoms above:

- > Keep them home from school
- > Get your child tested for COVID-19.
- > Contact your child's school and report that your child is sick. The school may ask some additional questions to help determine when it is safe for your child to return to school and about other people who may have been exposed.
- > The CDC has a Coronavirus Self Checker, which may help you make decisions about seeking medical care for possible COVID-19.

#### If your child does NOT have any of the symptoms above:

- > Consider whether your child needs to see a healthcare provider and be tested for COVID-19. Even if they don't have symptoms, your child should be tested if they:
  - » have been in close contact with someone with COVID-19, or
  - » have taken part in activities that puts them at higher risk for COVID-19 because they cannot physically distance as needed, such as participating in contact sports, attending a gathering with other children or family, or
  - » were asked or referred to get testing by a state, tribal, local external icon, and territorial health department or healthcare provider.
- > For the purposes of these criteria, daycare and school settings that implement multiple prevention strategies, such as universal and correct use of masks and physical distancing to the greatest extent possible, are not considered higher risk settings.
- > If they do not have symptoms and do not meet any of the criteria above, send them to school as usual.

*\*Only those students who are fully vaccinated will not need to stay home or quarantine in case of a positive case identified in school. Make sure to keep your immunization records updated at your school to avoid being quarantined.*

**We want to thank you for your continuous cooperation and helping us have a safe and successful back to 2021-2022 school year for all our CISD Community.**
